

Weekly safety checklist

Name of person doing inspection: ______ Date: ______

	1		1	1	4
Indoors	Okay	Action required	Specify action	Date completed	Comments
Facility-wide					
Strict "no smoking" and "no weapons" policies are in force.					
Entranceways and exits are free of obstacles or clutter.					
Doors can be easily opened by adults, but not by children.					
Staff and visitors can store their purses, backpacks and other personal belongings out of the sight and reach of children.					
Diaper/laundry bags that are to be sent home are hung out of the sight and reach of children.					
Telephones are easily accessible by staff, and a list of numbers for emergency services is posted next to every phone.					
All unused electrical outlets have protective safety covers.					
 Single-receptacle extension cords are inaccessible by children and have not been nailed to a wall or run under rugs. The empty outlet has a protective safety cover. 					
Garbage containers are foot-activated, plastic-lined, and have tightly fitting lids.					
Throw or area rugs do not slide or buckle.					
Pet food bowls and litter boxes are not accessible to children.					
All blind and curtain cords are tied up and secured with safety hooks.					
Window guards prevent windows from opening wider than 10 cm (4 in.).					
Halls and stairways are well lit and free of obstacles and clutter.					
Hardware-mounted safety gates are installed at the top and bottom of stairways, and pressure gates are used to prevent access to hazardous areas, as appropriate.					
Floors are vacuumed every day and as needed.					
Furniture					
 Cribs, playpens and high chairs have intact, readable labels bearing the manufacturer's name, product name and model number. They meet all current safety standards. Specifications for safe use, including height, age and weight limits, are known and adhered to. 					
The height, age and weight limits for accessories (e.g., a baby swing or a stationary activity centre) are known and adhered to.

Indoors	Okay	Action required	Specify action	Date completed	Comments
No infant under 4 months of age is put into a stationary activity centre.					
A stationary activity centre is positioned away from stairways, plants, hot surfaces, or any object that can be reached for and pulled over.					
Furniture is positioned away from windows.					
There are no wall hangings, lamps or pictures within reach of a crib.					
Crib mobiles are removed if a child using the crib is 4 months old or can push up on hands and knees.					
Potentially hazardous items (e.g., a rotating chair, chairs that pull out, retract or recline, or exercise equipment) are not accessible by children.					
Cubbies, bookcases, change tables, dressers and entertainment units are well constructed, stable and anchored to the wall.					
Other heavy objects (e.g., a TV) are anchored securely to the wall to prevent toppling.					
Play areas, toys and indoor play structure	20				
Play areas for children under and over 3 years of age are separated, to minimize the risk of injuy to younger children during play, as well as their access to inappropriate toys.					
Toys are age-appropriate and suited to the abilities of the children playing with them.					
Toys for different age groups are stored separately.					
No toy small enough to fit inside an empty toilet roll is accessible by babies and toddlers.					
Toy labels with age-related and small parts warnings and instructions for safe use are known and adhered to.					
Toy instructions or manuals are kept on file.					
Age-appropriate, non-toxic, non-edible arts and crafts materials are stored in labelled containers out of the reach of children.					
No toy has a pull cord or string longer than 20 cm (8 in.).					
Indoor play structures are safely positioned, away from windows and other furniture, with a proper fall zone, and sufficient surfacing to cushion a fall.					
 Wheeled toys (e.g., ride-on toys) are appropriate for the age and stage of children using them. Their height, age and weight specifications are known and adhered to. 					
Children wear a certified helmet when using wheeled toys.					

Indoors	Okay	Action required	Specify action	Date completed	Comments
Kitchen and eating areas The kitchen is equipped with a working fire					
extinguisher that staff have access to and know how to use.					
Hot water faucets have a scald guard, and the water heater's temperature setting is no higher than 49°C (120°F).					
A safety gate is installed in the kitchen doorway to prevent toddlers from entering the room at unsafe times (e.g., when the dishwasher is running).					
There are no dangling appliance cords.					
Sharp objects (e.g., knives, scissors) and plastic bags are inaccessible by children.					
Medications (including vitamins) are stored out of the sight and reach of children (in a locked cupboard or sealed container in the fridge).					
The high chair is positioned away from furniture or appliances that a child might reach for.					
Placemats rather than a tablecloth are used at the table.					
Stove knobs at child height are removed when not in use.					
The garbage can and compost container are inaccessible to children.					
Foods that pose a choking risk are inaccessible to children.					
Dethere and the second second					
Bathroom, washroom, diapering area					
and-eye latch when not in use, and cannot be locked by a child from inside.		_			
Non-slip step stools are provided for sinks and toilets, as needed.					
 All household cleaning agents are stored in their original containers, out of the sight and reach of children, and preferably in a locked cupboard. 					
Bleach solutions are properly labelled (e.g., 1:10, 1:100), and are inaccessible to children.					
The diaper pail is inaccessible to children, preferably in a latched cupboard.					
Soiled cloth diapers are disposed of in securely tied plastic bags.					
Soiled diapers and plastic bags are inaccessible to children.					
Medications and personal care products (e.g., mouthwash, cosmetics) are stored out of the sight and reach of children.					
Faucets have a scald guard.					
Items such as hairdryers are unplugged when not in use and inaccessible to children (e.g., no dangling cords).

Transition and storage areas					
A "no idling" policy is in force at drop-off and pick-up times.					
The fence separating the children's play area from the driveway or garage is at least					
1.2 m (4 ft.) high,					
climbing resistant, andin good repair.					
Gates work properly (e.g., they self-close and self-latch).					
Stair gates on the porch, deck or balcony are properly installed, and always used when children are present.					
Porch and deck rails are no more than 10 cm (4 in.) apart, and in good repair.					
Garbage storage areas and bins are away from play areas, and inaccessible to children.					
Lawn machines and power tools are inaccessible by children, and never used					
when children are playing in the yard.					
The garage is inaccessible to children.					
The barbeque is inaccessible to children.					
Play area					
Play equipment is checked for rusting, new pinch- or catch-points, and other signs of wear and tear.					
Surfacing under play equipment is checked daily for litter and sharp or foreign objects, and raked weekly to maintain depth, softness and an even distribution					
around play equipment. Plants known to be toxic and mushrooms are					
removed.					
No new pool of water more than 5 cm (2 in.) deep is accessible to children (e.g., rain run-off).					
The facility vehicle					
The vehicle is insured, in good repair, and					
equipped with age-appropriate child seats, or a seat belt, for every child and staff member to be transported.					
Car seats have a CMVSS label and meet current safety standards.					
 They are installed correctly, using UAS/ LATCH or seat belt, and installed securely (e.g., they do not 					
move more than 2.5 cm (1 in.) forward or from side to side).					
The height, age and weight specifications for each car seat are known and adhered to.					
Copies of the manufacturer's instructions for all car seats and the vehicle owner's manual are kept in the vehicle.					
Loose items are stowed so that they will not fly in case of a sudden stop.					
The vehicle is equipped with a first aid kit.
